

THE INDIANA PREVENTION RESOURCE CENTER
2015 MAIN FINDINGS

INDIANA YOUTH SURVEY

(Formerly known as Alcohol, Tobacco and Other Drug
Use by Indiana Children and Adolescents)

ABC School Corporation **- 6th Grade Students -**

Survey Conducted January through April 2015
Report Dated August 2015

**Conducted by: Indiana Prevention Resource Center
School of Public Health-Bloomington
Indiana University
501 North Morton Street Suite 110
Bloomington, IN 47404**

**<http://www.drugs.indiana.edu>
INYS@indiana.edu
Toll free: 1-800-346-3077
Fax: 812-855-4940**

Funded in part by a contract with the Indiana Family
and Social Services Administration - Division of
Mental Health and Addiction

INDIANA YOUTH SURVEY

Thank you for participating in the 2015 Indiana Youth Survey! Your participation allows us to collect valid data about children and adolescents across the state of Indiana. We can then present this data to state officials so they can better understand the students in Indiana as well as identify and address any issues related to substance use and mental health.

We also hope that your INYS report results will be of value to your school/corporation. We believe these results can help you better understand your student body, inform school policies, select prevention programs or curricula, collaborate with community prevention efforts, and provide necessary data for grant and funding applications.

If you have any questions about your report, please contact the INYS Coordinators at 1-800-346-3077 or at INYS@indiana.edu.

Thank you!

Note: A single copy of this report was prepared for the designated local survey coordinator. The local data contained herein are the property of the local survey sponsor. They will not be released to anyone else by the Indiana Prevention Resource Center (IPRC). The local survey sponsor may determine whether or not to release these data to anyone else. If released, a reference to the source would be appreciated. Statewide data are the property of the IPRC and the Trustees of Indiana University, and they are copyrighted. Permission is granted to distribute the statewide results with the copyright notice.

Selection Criteria

The table below describes the number of surveys collected from participating students in your school/corporation. There is a protocol for checking errors to eliminate unreliable responses. A survey meeting any one of the following exclusion criteria was not included in the data analysis:

- Majority of the survey questions were left unanswered
- Student indicated they did not answer survey truthfully
- Student indicated use of fictitious drug
- No gender information provided
- No grade information provided
- Implausible combination of age and age of first time use of substances
- Inconsistent responses
- Pharmacologically implausible responses

Only valid surveys (**Usable surveys**) were included in the final analyses.

**Number of Usable Questionnaires
ABC School Corporation Students, 2015
(Count, Percentage)**

		Year	
		2015	
selected	Blank surveys/Refused to participate	2	.3
	Not truthfully at all response	5	.8
	Indicated fictitious drug (vivo) use	1	.2
	Rejected by gender check	13	2.2
	Rejected by grade check	4	.7
	Rejected by age and onset age check	.	.
	Rejected by consistent use check	.	.
	Rejected by dose check	.	.
	Usable surveys	575	95.8
	Total	600	100.0

Demographic Information

The following table shows the demographic characteristics of the students participating in the survey from your school corporation. Please note that NO DATA will be presented in this report for any **grade level with fewer than 30 usable surveys**. This is to protect the **confidentiality** of your students.

**Demographic Information
ABC School Corporation Students, 2015
(Valid cases only: Count, Percentage)**

		Year	
		2015	
Q1 Gender	Male	304	52.9
	Female	271	47.1
Q2 Hispanic/Latino	Non-Hispanic	478	91.7
	Hispanic	43	8.3
Q3 Race	White	493	87.9
	Black/African American	7	1.2
	Asian	2	.4
	Native Hawaiian/Pacific Islander	1	.2
	American Indian/Alaskan Native	3	.5
	Race not known or other	27	4.8
	More than one race	28	5.0
Q4 Grade	6th	575	100.0
Q5 Age	10 years or younger	1	.2
	11 years	171	31.1
	12 years	333	60.7
	13 years or older	44	8.0

Prevalence Rates for Alcohol, Tobacco and Other Drug Use

Monthly prevalence rate is defined as the percentage of students who reported using a particular substance at least once within the past 30 days. The following table shows the monthly prevalence rates among your school corporation's students who participated in the survey. Binge drinking is defined as 5 or more alcoholic drinks in a row in the past 2 weeks.

If your school corporation has participated in the survey more than once in the past ten years, trend data are provided so that you can monitor changes in prevalence rates between years. Please note that the cleaning protocol used by the IPRC to determine valid surveys was changed in 2015. These changes were made to better align the methodology with that used by national surveys. These changes may have a noticeable effect on the reported rates, especially for alcohol use, binge drinking, and marijuana use. Therefore, caution should be used when comparing the 2015 data with earlier years.

**Past Month Use of Alcohol, Tobacco, and Other Drugs

Notes: --Data not available.

Local data represent entire school corporation for this and previous years, when available.

State data from the Indiana Youth Survey, IPRC, 2015.

Mean Age of First Time Use of Alcohol, Tobacco and Other Drugs

Research has shown that the younger a person is when she or he begins using alcohol, the more likely the person is to experience alcohol dependence and abuse.^{1,2} Compared to persons who began drinking at age 21 or older, those who began drinking before age 14 were more likely to experience alcohol dependence later in life.³ The table below shows the average age of first use among students who reported using a particular substance at least once during their lifetime.

**Mean Age of First Time Alcohol, Tobacco, and
Other Drug Use
ABC School Corporation Students, 2015
(Valid cases only: Mean age)**

At what age did you first use...?	Grade
	6th
Q9 Cigarettes	10.46
Q9 Alcohol	10.85
Q9 Marijuana	11.00
Q9 Inhalants	10.50
Q9 Prescription drugs	10.80
Q9 Other illegal drugs	10.40

2 Warner, L. A., & White, H. R. (2003). Longitudinal effects of age at onset and first drinking situations on problem drinking. *Substance Use & Misuse, 38*(14), 1983-2016.

3 Hingson, R. W., Heeren, T., & Winter, M. R. (2006). Age at drinking onset and alcohol dependence: Age at onset, duration, and severity. *Archives of Pediatrics & Adolescent Medicine, 160*(7), 739-746.

Communities that Care (CTC) Risk and Protective Factors

Risk factors are conditions that increase the chances that children will become involved in problem behaviors in adolescence and young adulthood.¹ Measures included in the *Indiana Youth Survey* from the Communities That Care (CTC) System can predict alcohol and other drugs use, as well as delinquency, dropping out of school, teen pregnancy and violence. Students with elevated risk factor scores have a higher likelihood of substance use and problem behaviors compared to those with low risk factor scores.

CTC is based on the Social Development Strategy which focuses primarily on the strengthening of protective factors. **Protective factors** are conditions that have a positive influence and “protect” or “buffer” against the negative influences associated with risk factors. Though closely related, protective factors are not the opposite of risk factors but rather reduce the effects of existing risk factors.

The Indiana Prevention Resource Center uses a cut-point method to identify elevated risk factors and depressed protective factors on the *Indiana Youth Survey* for students in grades 6, 8, 10 and 12.² Survey respondents were divided into two categories – low risk and high risk for risk factors, and low protection and high protection for protective factors– based upon national data. Students from around the country were asked the same questions.

For example, youth were asked: “How much do you think people risk harming themselves if they try marijuana once or twice?”

All of the responses from the national survey were scored with a numerical value and put in order from lowest to highest, and the middlemost score was identified. This score is the median and it divided all responses into two halves (50% of responses are at/below the median and 50% are above the median). The median was used to determine the cut point for low and high groups. In this example, any youth that indicated a 2 or higher is considered to be at high risk.

In simple terms, if 50% of the students in Indiana are at high risk and 50% are at low risk on a particular risk factor, then the Indiana students are similar to the nationwide data. **Problem areas are considered to be any risk factors with 50% or more of students showing high risk or any protective factors with 50% or more of students showing low protection.** The following

table shows the percentage of students at low or high risk for six different risk factors, while the second table shows the percentage of students at low or high protection for six protective factors. Please take note of **bold numbers over 50.0**.

**Percentage of students with CTC risk factor scores
at/below (low risk) or above (high risk) the national
standard
ABC School Corporation Students, 2015**

		Grade
		6th
Risk score - Poor family management	Low risk	78.6
	High risk	21.4
Risk score - High family conflict	Low risk	62.7
	High risk	37.3
Risk score - Parental attitudes favor drug use	Low risk	89.9
	High risk	10.1
Risk score - School academic failure	Low risk	65.7
	High risk	34.3
Risk score - Peer-individual perceived risk of drug use	Low risk	43.8
	High risk	56.2

Note: The national standards (cut-off points) are provided by the Social Development Research Group at the University of Washington.

**Percentage of students with CTC protective factor scores
at/below (low protection) or above (high protection) the
national standard
ABC School Corporation Students, 2015**

		Grade
		6th
Protective score - Community rewards for involvement	Low protection	61.3
	High protection	38.7
Protective score - Family opportunities for involvement	Low protection	35.2
	High protection	64.8
Protective score - Family rewards for involvement	Low protection	38.5
	High protection	61.5
Protective score - School opportunity for involvement	Low protection	29.0
	High protection	71.0
Protective score - School rewards for prosocial involvement	Low protection	37.6
	High protection	62.4
Protective score - Peer-individual interaction with prosocial peers	Low protection	39.1
	High protection	60.9

Note: The national standards (cut-off points) are provided by the Social Development Research Group at the University of Washington.

Identification of elevated risk and low protection is important in addressing several problem behaviors among youth. Implementation of evidence-based curricula and environmental strategies is the best way to address these issues. Visit www.findyouthinfo.gov for more information.

Mental Health

Prior research has demonstrated robust relationships between adolescent depression, suicidal behavior and substance abuse.^{1,2,3} As a result, the State is trying to better understand the prevalence of mental health concerns among Indiana’s youth. Mental health was measured for the past year (12 months) with survey items that asked about “feeling so sad or hopeless almost every day for two weeks or more in a row that you stopped doing some usual activities,” “seriously consider attempting suicide,” and “making a plan about how you would attempt suicide.” Since the survey is anonymous, individual students and their mental health problems cannot be identified. Thus, it is advised that referral resources be a part of your school’s student assistance policy.

**Mental Health in the Past Twelve Months
ABC School Corporation Students, 2015
(Values are percentages, valid cases only)**

During the past 12 months, did you...?		Grade	
		6th	
Q21 Feel sad or hopeless for 2+ weeks in a row	No		81.6
	Yes		18.4
Q21 Seriously consider attempting suicide	No		93.7
	Yes		6.3
Q21 Make a plan about attempting suicide	No		93.9
	Yes		6.1

Frequency Tables

The responses to all survey questions are presented in this section, in three segments. The tables are first presented by grade level, followed by tables including only male student responses, and lastly tables including only female student responses. The responses to the individual items that make up each of the CTC risk and protective factors are provided. The frequency tables are presented in the following order in each of the segments:

- Personal and Family Information
- Past Month Use of Alcohol, Tobacco, and Other Drugs
- Age Distribution of First Time Alcohol, Tobacco, and Other Drug Use
- Perceived Risks of Drug Use
- Perceived Peer Approval of Drug Use
- Parental Attitudes Favorable Toward Drug Use
- Parental Attitudes Favorable Toward Antisocial Behavior
- Mental Health in the Past Twelve Months
- Poor Family Management
- Family Conflict
- School Opportunities for Prosocial Involvement
- School Rewards for Prosocial Involvement
- Academic Failure
- Family Opportunities for Prosocial Involvement
- Family Rewards for Prosocial Involvement
- Community Rewards for Prosocial Involvement
- Interaction with Prosocial Peers

Personal and Family Information
ABC School Corporation Students, 2015
 (Values are percentages, valid cases only)

		Grade
		6th
Q1 Gender	Male	52.9
